Learning Objectives

- 1. Search for existing resource records
- 2. Add new resource records
- 3. Edit existing resource records
- 4. Add resource contacts as Worker records
- 5. Add Service Areas for the Resource
- 6. Add Services for the Resource
- 7. Add service specific Service Areas for the Resource
- 8. Add additional resource characteristics as Conditions
- 9. Link child records to a parent agency (i.e. locations)

Resource Management

eCIRTS offers call tracking and searching of an integrated resource directory that features the AIRS taxonomy to efficiently handle increasing Elder Helpline call volume and requests for Information, Referral, and Assistance. In Phase 2, the online resource directory will allow clients, caregivers, and loved ones to quickly search for local provider organizations and available services within their communities. Using a simple search box or an advanced search feature, resources and provider services can be found using a variety of parameters (e.g., service name, service area, provider name, etc.)

Before the resources are available in the resource directory search, they must first be added to eCIRTS in the Resources Chapter. The Department will initiate the process of adding a new resource by completing the application process and make sure the resource meets required inclusion and exclusion criteria. The Department will add the Resource record to eCIRTS, along with applicable taxonomy codes.

Designated PSA staff, those part of the Referral Workgroup, will finish and maintain the Resource records. The PSAs won't have access to add new Resource records, but they will be able to add additional information to an existing record. (i.e. hours, service description, program name, languages spoken, etc.)

Search for an Existing Resource Record

The first step for almost every action in eCIRTS is to search for an existing record. If one doesn't exist, a new record can be added.

- 1. Select the eCIRTS Admin role which has access to add records to the Resources Chapter and click Go.
- 2. Click on the **Resources** Chapter.
- 3. Select Advanced Search, enter the Resource Name and any other criteria in the search. Click Search.

5. Select the Resource name from the List View grid.

Add a New Resource Record

You must search for a matching resource record before you can add a new resource record. This practice helps prevent duplicate records in the application. The Department will add new resource records. The PSAs can edit them once they've been added to the system.

- 1. Use the eCIRTS Admin role and select the **Resources** Chapter.
- 2. Select Advanced Search.
- 3. From the File menu, select Add New Resource Search.

|---|--|---|
| Filters Agency Key Resource Name Active | Contains Contains Equal To | AND V X AND V X AND V X |
| Division Division Agency Key Resource Name Street | + | Search Reset |
| City State Zip Code Active eCIRTS Resource ID | | |

NOTE

Each search filter contains four parts:

- 1. Filter Field: the data point to search on
- 2. **Operator**: the relationship between the filter field and the value described further in the table below.
- 3. Value: the filter field answer to search on
- 4. **Connector**: the relationship between this filter and other filters in the search. **AND** tightens your search: only returns records that meets <u>ALL</u> filter criteria. **OR** broadens your search: returns records that meet <u>ANY</u> of the filter criteria.

| Operator | Definition |
|--------------|---|
| Equal To | Returns records that match the entered criteria. For example, if <last name=""> is entered as "equal to" a specific person's name, the Member records assigned to that worker will be returned.</last> |
| Begins With | Returns records that begin with the entered criteria. For example, if <last name=""> is entered as "begins with" 'T' the system will return records assigned to the worker having last names that start with 'T', such as Tester and Thomas.</last> |
| Ends With | Returns records that end with the entered criteria. For example, if you search on <last Name> "ends with" 'r', you can retrieve records where a Member's name ends in 'r', such as Tester.</last |
| Not Equal To | Returns records that do not match the entered criteria. For example, if a name is entered for <last name="">, the system will return a list of records except those records for the name provided in the search criteria.</last> |
| Greater Than | Returns records that are dated later than the entered criteria. For example, if <dob> is entered as "greater than" '03/01/2015', the system will return all records whose dates of birth are after March 1, 2015.</dob> |
| Less Than | Returns records that are dated earlier than the entered criteria. For example, if <dob> is entered as "less than" '03/31/2015', the system will return data for all records with a birth date before March 31, 2015.</dob> |
| Contains | Returns records that contain the entered criteria. For example, if <last name=""> is entered as "contains" specific values in the person's name, the Member Record(s) assigned to that worker with those values would be returned.</last> |
| Blank | A record is returned where the selected field does not have a value in the field. |
| Non-Blank | Returns records where the selected field does have a value in the field. |

- 6. If a match is not found, select Add New. Proceed to the <u>Resource Details</u> section.
- 7. If a match is found, select the Resource name from the List View grid and proceed to Edit a Resource Record.

Edit a Resource

You will be able to edit the basic Resource information which includes the Resource's name, number, contact information and address. The eCIRTS Admin role can edit this information. The ADRC Records Management role can also edit it, but cannot add it.

- 1. Open the provider record in the **Resources** Chapter.
- 2. Select the Resources tab. From the Edit menu in the toolbar, select Edit Resource.

4. From the **File** menu, select **Save and Close Resource** when complete.

Resource Details

The Resources tab contains the demographic data on agencies and programs. If you are adding the resource record, the Resource Details page displays after selecting **Add New**. If you are editing the resource record, the Resource Details page displays after you select Edit Demographics from the Toolbar.

1. The Resource Details page displays. Update any fields as needed.

| Field | Use |
|--|---|
| Basic Information | |
| Agency Key Number | Select the PSA |
| Resource Name | Enter the name of the Resource |
| Other Name (AKA) | Enter any other names for the Resource |
| Active | A resource must be active to be visible in the Resource Directory |
| Exclude from Selection | A resource must not be excluded to be visible in the Resource Directory. The Department may exclude a resource from selection until they have finished the application process. |
| Active/Inactive Comments | Can be used by the Department to track progress through the application process and/or reason for inactivating. |
| Year Started | Enter the year if known |
| Tax ID number | Enter if ID number if known |
| IRS Status | Enter the status if known |
| Overview | Enter the overview of the agency or program |
| Facility Type | Select the facility type |
| Agency Type | Select the agency type |
| Formal Update | Used by the ADRCs to track the annual resource directory updates |
| Email Broadcast Date | Used by the ADRCs to track the annual resource directory updates |
| Printed in Local Directory? | Used by the ADRCs to track the annual resource directory updates |
| Include in Website? | Used by the ADRCs to track the annual resource directory updates |
| Intake Procedure | Select the intake procedure if known |
| Contact Address | |
| Street | Enter the street address |
| Street 2 | Enter the suite, apartment number, etc. |
| City | Enter the city |
| State | Enter FL |
| Zip Code | Enter the zip code |
| Phone | Enter the best contact phone number |
| Email | Enter the email |
| Website | Enter the website of the agency or program |
| Mailing Address | |
| Mailing Address Same as Contact Address | Use this shortcut if the mailing address it the same as the Contact Address. The application will copy it over. |
| Mailing Name | If a different agency/program name is used for the mailing address, enter it here |

| Mailing Contact Name | Enter the name of the contact person if known |
|----------------------|---|
| Mailing Street | Enter the street address |
| Mailing Street 2 | Enter the suite, apartment number, etc. |
| Mailing City | Enter the city |
| Mailing State | Enter FL |
| Mailing Zip Code | Enter the zip code |

- 2. When finished, from the File menu, select Save or Save and Close Resource.
- 3. Contact and Mailing address are the most common resource addresses, so they are accessible on the Resource Details page. Adding them on the Resource Details page also adds them to the Addresses subpage, one record per address. If there are additional addresses besides Contact and Mailing that need to be added, they are added on the Addresses subpage.
- 4. Contact (Physical) phone is the most common resource phone number so it is accessible on the Resource Details page. Add it to the Resource Details page also adds it to the Telephone Numbers subpage, one record per phone number. If there are additional phone numbers besides Contact (Physical) phone that needs to be added, it is added on the Telephone Numbers subpage.

Resource Addresses

Resource addresses will appear on the resource details page and on the addresses subpage. There can be several addresses for each of the Contact, Mailing and Correspondence types. There can be one address type selected as primary which will then display on the main resource page under the specific section for that address type.

- 1. Open the resource record. Select the **Resources** tab.
- 2. Select File > Edit Resource. The Resource detail page opens.
- 3. Select **Addresses** from the left-hand navigation menu.

7. Update the following fields:

Note: In order for the address to appear on the Resource detail page the Address Type must be Contact or Mailing and the record must be marked as the primary address and active.

| Field | Use |
|--------------|--|
| Address Type | Select Contact, Mailing or Correspondence. |
| Primary | Check this box if the address should also display on the Resource Details page. Address Type must be Contact or Mailing and the address record must also be active. |
| Street | Enter the street address |
| Street 2 | Enter the suite, apartment number, etc. |
| City | Enter the city |
| State | Enter FL |
| Zip Code | Enter the zip code |
| Start Date | Enter a start/effective date for this address |
| End Date | Leave this field blank unless you are inactivating an address record. You would enter an end date and uncheck the Active checkbox. |
| Active | Check this box if the address should also display on the Resource Details page. Address Type must be Contact or Mailing and the address record must also be marked as primary. |
| Comments | Enter if needed |

8. Select File > Save and Close Address when complete.

Resource Telephone Numbers

Resource phone numbers will appear on the resource details page and on the telephone numbers subpage. There can be several numbers for each of the Contact, Mailing and Correspondence types. There can be one address type selected as primary which will then display on the main resource page under the specific section for that address type

- 1. Open the resource record. Select the **Resources** tab.
- 2. Select File > Edit Resource. The Resource details page open.
- 3. To add a phone number via the Telephone Number(s) subpage, select **Telephone Number(s)** from the left-hand navigation. The Telephone Numbers list view page opens. Phone numbers added via the detail page will be displayed in the list view. To edit a phone number, select it from the list view.

| Primary | Needs to be checked if the Phone Type is and this number should display on the Resource Details page. |
| Comments | Enter if needed. |

7. Select File > Save and Close Telephone Number when finished.

Division

When a new resource record is created and the details page is saved, eCIRTS automatically opens the Division details page. All resources must have an open Division record before their Resource record can be created in eCIRTS. Once the Division record is created, it does not need to be changed, unless the Resource record needs to be closed.

- 1. For new resources, the Division details page opens when the Resource Details page is saved. Skip to step 3 to finish adding the Division record. Only the Department will be adding new resources and adding Division records to eCIRTS.
- 2. The Department may need to inactivate a resource. In those cases, the existing Division record will be closed. From the Resource record, navigate to the **Divisions** tab and select the record from the list.

4. From the File menu, select Save and Close Division.

Contacts - Workers

The Workers tab contains information about contacts for the resource. Contacts for the agency or program are added as workers in eCIRTS. i.e. Site Director, Program Director, Contact Person. Resource workers will be added into eCIRTS via the initial data conversion. If the Resource needs a new worker added after go live, the Department or PSA designees will follow the steps outlined below.

1. To view the Workers tab, open the Resource record and select the **Workers** tab. Existing worker records, if any, are shown in the list view grid.

| MY WORK | CONTACTS | CLIENTS | CLIEN | T GROUPS | AGENCIES | PROVIDERS | RESOURCES | REPORTS | UTILITIES | CLAIMS | |

- 2. Before you can add a new worker record, you must conduct a search to make sure that the worker doesn't already exist. This helps to prevent duplicate records.
- 3. Use the eCIRTS Admin or ADRC Records Management role to add a worker to the Resource record.
- 4. Search for and select the Resource record and select the **Workers** tab.
- 5. Select File > Add New Worker Search. The Worker Search page opens.
- 6. Enter in the Search criteria and click Search.
- 7. If a match is found, select it from the list view grid. The Worker record opens and information can be updated before attaching to the resource. Skip to step 9.

| ELDER AFFAIRS | Gotham City Senior Center Worker Search 11/11/2021 3:19 PM |
|--|---|

10. Select **File > Save and Close Worker** when done. An eCIRTS generated Member ID has been assigned to this worker. The worker has been added to the Resource record.

Service Area

The Service Areas tab is contains information about what areas the resource serves in the community. Resources also have service-specific service areas. A master Service Area record must exist for the Resource first before service-specific service areas can be added.

1. Open the Resource record and select the **Service Areas** tab. Each resource will have a single service area record.

- 3. To add a new Service Area, from the File menu, select Add Service Area.
- 4. The Service Area page displays. Select or update the service area. Select the values in the left-hand box and move them to the right-hand box using the arrows.

Note:

Select the most specific level of service area first and the application will populate other details. Do not go top down. For example, when you select the zip code, the application will populate the appropriate state, region, county, and city fields.

Note:

To select multiple values, press CTRL while you select the values you want to apply. Use the arrow button to move the value from the left box to the right box.

- The double right arrow button will move all value from the left to right
- The single right arrow button will move selected values from left to right
- The single left arrow button will move all values from right to left
- The double left arrow button will move selected values from right to left
- 5. From the File menu, select Save and Close Service Areas when done.

Services/Taxonomy

The Services tab is where you can record the services, by Taxonomy code, that an agency or program would offer to the community. The Service/Taxonomy must exist first in the Service Codes Utility, managed by BIT, and then it can be associated with a Resource by the Department or PSA staff. A service/taxonomy must be added to a resource before it will be visible in the Resource Directory for the Helpline staff.

Note: The Service codes must be set up in the Service Code Setup Utility before you can add a service to a resource. For assistance, please contact your System Administrator.

Add or Edit a Service/Taxonomy

- 1. Open the Resource record and select the **Services** tab.
- 2. If you are editing a Service/Taxonomy select a record from the list.
- 3. If you adding a new Service/Taxonomy, from the File menu, select Add Services.
- 4. The **Service/Taxonomy** page will open in a new window. Update the following fields:

| Field | Use |
|-----------------------------------|--|
| Service ID | Search for and select the service/taxonomy. See the Search tips section below. |
| Billable | Do not check this box |
| Active | This must be checked for the service to be visible for the resource in the Resource Directory. |
| Active Date | Enter a start/active date |
| End Date | Active service/taxonomy codes do not need an end date. Enter an end date when you are inactivating a service/taxonomy record for a resource. |
| Taxonomy Code | auto populates when you select the Service ID |
| Taxonomy Term/Service | auto populates when you select the Service ID |
| Secondary Code | This defaults as the Taxonomy code and does not need to be changed |
| Taxonomy Category | Enter the AIRS Problem Need. This field will change to a lookup field after Phase 1 go live. |
| Service Description/Guidelines | Enter the service description or any agency/program guidelines. |
| Hours | Hours are visible in the Service Description/Guidelines field for Phase 1. In Phase 2 they will be housed in a separate field. |
| Program Name(s) | A resource can have several Program Names. Program name is |
| | frequently used in the Resource directory search by the Helpline staff. |

| Payment Options/Eligibility | This used to be 2 fields in CIRTS and text fields. In eCIRTS, the fields are combined and multiple options can be selected |
|------------------------------|--|
| Resource Service Areas Allow | This box defaults to checked and should remain checked when the Resource record is created. Later when the PSA's update the Resource record, they will uncheck this box in order to add service specific service areas. |
| Unit Cost | Enter zero. This is an eCIRTS required field but doesn't have any functionality for Resources. If you do not add a value in this field, will get an error message when saving the page. |

Service-Specific Service Area

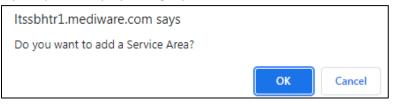

Service areas are the locations in which a specific service is offered by the Resource. By default, services use the resource's service area location, which is recorded in the resource Service Areas tab. If you are setting up a service that will be offered in a different, or more limited service area, clear the "Resource Service Areas Allow" field and then save the more specific service area.

| Payment Options/Eligibility | Call for Fee Information Depends on Services Direct Payment Donations Accepted Free Service Homeless Meen only |
|------------------------------|--|
| Resource Service Areas Allow | |
| Unit Cost-NA | \$0.00 |

Note: Add the service area record under the Services page creates an additional record that is associated with the specific service and does not affect the Service Areas record under the Service Areas tab in the main resource record.

- 1. Search for and select the Resource.
- 2. Select the Services tab and select the Taxonomy/Service that needs the Service area.
- 3. Uncheck the "Resource Service Areas Allow" field.
- 4. A prompt will display asking if you want to add a Service Area. Select Yes.

- 5. The **Areas Served** page displays. By default, the State, County, City and Zip Code selected on the Resource > Service Area tab is populated.
- 6. Update the service area specific to this service. Select the values in the left-hand box and move them to the right-hand box using the arrows.

| LDER AFFAIRS | | | Transportation Forever Last Updated by jbuck at 11/18/2021 12:57:48 PM | Area Served |

Note:

Select the most specific level of service area first and the application will populate other details. Do not go top down. For example, when you select the zip code, the application will populate the appropriate state, region, county, and city fields.

Note:

To select multiple values, press CTRL while you select the values you want to apply. Use the arrow button to move the value from the left box to the right box.

- The double right arrow button will move all value from the left to right
- The single right arrow button will move selected values from left to right
- The single left arrow button will move all values from right to left
- The double left arrow button will move selected values from right to left
- 7. From the File menu, select Save and Close Area Served when done.
- 8. You are returned to the Taxonomy/Services page. From the File menu, select Save Taxonomy/Service or Save and Close/Taxonomy Service.
- 9. The service specific service area is visible on the Area Served subpage.
- 10. If you need to edit the service specific service area, select the Area Served subpage and update the values. As long as the "Resource Service Areas Allow" field is blank on the services page, the Area served can be edited for the service.

Conditions

The Conditions tab stores additional resource characteristics such as languages spoken, payment options, accessibility, and age and gender restrictions. This information helps users find an agency or program that offers the appropriate service. For example, not all agencies accept both male and female patients.

- 1. To add a new condition, use the eCIRTS Admin or ADRC Records Management role.
- 2. Search for and select the Resource record. Select the **Conditions** tab.
- 3. Each resource can have one Conditions record. If it already exists and needs to be updated, select Edit Conditions from the File menu.

- 6. When finished, from the File menu, select Save and Close Conditions.

Linked Resources

The Linked Resources tab shows the relationship between a parent agency and subsidiaries. The subsidiaries are known as child resources. You can edit the parent information without applying those changes to the child resource. You can also edit the child information without applying those changes to the parent resource.

- 1. Use the eCIRTS Admin or ADRC Records Management role to add a linked resource.
- 2. Search for and select the parent resource record. Select the Linked Resources tab.
- 3. If a linked resource relationship exists, it is shown in the list view grid. If you need to edit an existing linked relationship, select it from the list and skip to step 5.
